

“Greening Los Angeles: A Sustainable Future for All”

Efforts to create a “green” Los Angeles have secured numerous investments to create jobs and improve quality of life in Los Angeles. Given the economic downturn and the substantial amount of Federal support for infrastructure programs, this may be the opportunity for the City to expand its focus to include more equitable “green” development, widespread use of alternative energies, policies to promote “green” businesses, and investment in employment opportunities in these emerging industries. The panel will discuss these issues and offer timely information on the science and technological developments of alternative energy.

Confirmed Panelists to Date:

Samuel Kang, Managing Attorney for the Greenlining Institute
Keith Moo-Young, CSLA, Dean of College of Engineering, Computer Science,
and Technology

Thursday, May 20, 2010
